Online payments

Learn about your integration options for accepting payments online.

Optimize your payments integration and increase revenue with the Optimized Checkout Suite, which includes [payment UIs](#), [dynamic payment methods](#), and [faster checkout with Link](#). To get started, [find the integration](#) that meets your business needs or explore the demo to see how the features work.

[Explore the demo](#)

Payment UIs

Use prebuilt payment UIs to accept payments online.

Shareable payment links

Use Payment Links to embed or share a link to a Stripe payment page to accept payments without a website.

Integration effort: ● ● ● ●

Prebuilt checkout form

Use Stripe Checkout to embed or redirect to a prebuilt payment form on your website.

Integration effort: ● ● ● ●

Custom payment flow

Use Stripe Elements to design a custom page to collect payments.

Integration effort: ● ● ● ●

In-app payments

Use the Mobile Payment Element to accept payments in your iOS, Android, or React Native app.

Integration effort: ● ● ● ●

Add payment methods

Accept more payment methods to help your business expand its global reach and improve checkout conversion.

Dynamic payment methods

Simplify your payment methods code by dynamically ordering and displaying payment methods.

A/B test payment methods

Launch an A/B test for a new payment method in the Dashboard.

Payment method rules

Control when payment methods are available to your customers.

Payment method configurations

Create different sets of payment methods to display to customers based on specific checkout scenarios.

Add Link for faster checkout

Use **Link** to let your customers select a saved payment method at checkout instead of entering payment information. Your customers can save their credit cards, debit cards, or US bank accounts for faster checkout at any Link-enabled business. Link also lets you accept **Instant Bank Payments** and **Klarna**.

Link with Checkout

Use Link with the Stripe prebuilt payment page.

Link with Web Elements

Embed Link into your custom payment page for faster checkout.

Link with Mobile Elements

Add Link to your native iOS, Android, and React Native apps.

Compare features and availability

All integrations support one-time and recurring payments, fraud protection, and global payments.
